RE: AB 2270 – Support

Dear Governor Schwarzenegger,

On behalf of the California Alliance for Golf (CAG) I want to reiterate the support we gave in the legislature to AB 2270 (Laird and Feuer), regarding recycled water and water quality.

California Alliance for Golf (CAG) is a non-profit corporation which functions as a trade association representing roughly 1,000 golf facilities in the state as well as 3 million golfers.

Many of our golf courses currently use recycled water. We believe more golf courses would be potential end-users or customers for recycled water if some of their fears could be put to rest. Salts present one of the biggest challenges for golf course superintendents who currently use or considering the use of recycled water.

Reducing salts in recycled water will improve the attractiveness of recycled water as an alternative water supply source. CAG encourages the use of recycled water at golf courses and believes it would be similarly desirable for many outdoor irrigation applications if poor water quality is not a major deterrent.

CAG is eager for your signature on AB 2270.

Sincerely,

Robert L. Bouchier, Executive Director
